Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

1. The amendment filed on 6/27/06 has been entered. Claims 2-4, 6-8 and 19-21 are canceled, claims 1, 5, and 9-18 are now pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 5, and 9-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Sullivan (US 2003/0093320 A1).

Sullivan was cited in previous action.

As per claims 1, 5, 11, 16 and 18, Sullivan discloses a method in a computing environment for determining the taxes associated with an Internet transaction (see abs.), the method comprising; determining a destination address (fig. 1, 116); determining an origination address (fig. 1, 116); providing an address-geographical-region (AGR) table that associates said destination address with one or more geographic regions and said origination address with one or more geographic regions (figs, 3D-5B); based on said AGR table, determining one or more geographic regions associated with said destination address and one or more geographic regions associated with said origination address (fig. 3D); providing a geographic-region/tax-district (GRTD) table that associates said one or more geographic regions of said destination address

Art Unit: 3627

with one or more tax districts and said one or more geographic regions of said origination address with one or more tax districts (figs, 3D-5B); based on said GRTD table, determining one or more tax districts associated with said one or more geographic regions of said destination address and one or more tax districts associated with said one or more geographic regions of said origination address (figs, 3D-5B); comparing said one or more tax districts of said destination address to said one or more tax districts of said origination address (page 4, [0048]); identifying a set of geographic areas that said destination address and said origination address have in common (page 4, [0049]); determining a tax rate based on said set of identified geographic areas; and computing the tax associated with the Internet transaction based upon the determined tax rate (fig. 1; tax calculator).

As per claims 9 and 15, Sullivan discloses a method further comprising: comparing at least one tax-district-identification value of said destination address with at least one tax-district-identification value of said origination, and determining which tax-district identification value(s) of said destination and said origination address overlap (fig. 1, 270).

As per claims 10, 12-14 and 17, Sullivan discloses a computer system comprising providing a tax table to determine an appropriate tax rate associated with each determined tax-district-identification value; wherein said geographic-region component includes a table for determining geographic-region-identification values (see abs., fig. 3D).

Response to Arguments

4. Applicant's arguments with respect to claims 1, 5, and 9-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald Laneau whose telephone number is (571) 272-6784. The examiner can normally be reached on 5:30 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on (571) 272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
